Subject: Designation as Essential Business - International Controls & Measurements Corp.
Importance: High

Dear Mr. Kadah

Thank you for seeking designation as an “essential business” pursuant to the revised New York State Executive Order 202.6 with respect to your business function of Embedded control systems provider for the HVAC/R industry. Based on the information you have provided, **that business function is an essential business and/or supports an essential business and is not subject to the required 100% workforce reduction** pursuant to the revised Executive Order 202.6. **However, your business has been designated as essential solely with respect to those employees that must be present at the business location in support of essential business activities.** No other employees/personnel shall be permitted to work from your business’s location. Any other business activities being completed at your location that are not essential are still subject to the revised Executive Order 202.6. Please continue to comply with all other Executive Orders and recommendations from the New York State Department of Health and please consider reducing your workforce to the extent practicable.

Daniel Kolinski
Deputy Director, Central New York Region
