

# 3-PHASE ULTIMATE PROTECTION STOP MOTOR BURNOUTS

**Bundle, Save and Protect with the ICM450A/450A+ and ICM530 Series Surge Suppressors**

## WHY DO YOU NEED 3-PHASE PROTECTION?

- Phase loss and phase imbalance can quickly burn up a motor creating costly repairs
- Phase reversal can tear up a scroll compressor and cause other irreparable damage
- Fast acting transient surges can damage sensitive electronic control boards and destroy the ICM450A/450A+ voltage monitor as well

## ICM530 SERIES SURGE PROTECTION

- In many cases, manufacturers are requiring surge protection to maintain their equipment warranty
- With increasing demand on today's power grids, the need for surge protection is greater than ever
- Superior quality TMOV technology quickly clamps the surge and dissipates it, protecting your sensitive equipment
- Four models to choose from to cover Delta, Wye and Delta High-leg configurations

## Which Protection Bundle do I need?

Models	Three-Phase Voltage
ICM530 + ICM450A or ICM450A+	240 VAC Delta / Wye
ICM531 + ICM450A or ICM450A+	480 VAC Delta / Wye
ICM532 + ICM450A or ICM450A+	600 VAC Canadian Market
ICM533 + ICM450A or ICM450A+	240 VAC Delta High Leg / Older 3-Phase Grids
